Production Equipment

Separators, Heater Treaters, Quads, Scrubbers

American Equipment Manufacturing engineers and manufactures some of the oil and gas industries most economical and efficient vertical and horizontal separators, enclosed separators, heater treaters, scrubbers, and free water knockouts. The Olman Heath Company started our long history of engineering and manufacturing superior separators with a patented production unit called the HLP unit. American Equipment Manufacturing separators can be designed for 2 or 3 phase separation with direct or in-direct heating.
